Technology  
to give businesses  
the edge.

### **New Zealand Innovation in Action...**

System Controls Limited is an innovative New Zealand business. Our team is driven by the New Zealand pioneering spirit to deliver on innovation and provide automated solutions for our customers.

## The Industry Experts

System Controls Limited are the industry expert providers of automation and controls with services that range from Consultancy, Engineering, Electrical Design and Installation through to Building Management and Security Systems.

With over a decade of experience, our reputation for excellence is built on an outstanding portfolio... having provided the solutions that others couldn't.

Our mission at SCL is to add value to our customers business. We increase productivity and business efficiency through providing cost efficient, technologically advanced, automation and control solutions that take our customers ahead of the competition.

We undertake both large and small scale projects using our own experienced personnel. Project Managers, Engineers, Electricians and Programmers all create our knowledgeable in-house team, who ensure that our clients are provided with full turnkey engineering and electrical services.

We have successfully completed projects for many of the world's leading organisations including Qantas, Siemens, Fisher & Paykel, 3M, Fonterra, DHL, Swisslog, McDonalds and Fedex.

## Meeting Your Requirements

Where many providers can only offer specific aspects of service, SCL has the capabilities to design and implement an entire solution. Our broad range of expertise ensures that we can always offer the right man, the right service, the right product, creating the right solution for any company. SCL are the 'one stop shop' for all automation and electrical requirements.

### Logistics

SCL have a dedicated team of experts that provide solutions for Warehousing, Distribution, Materials Handling and Airport Systems.

### Industrial Automation and Process Control

SCL provide our customers with the technology to advance their business and make them leaders in their industry. We can optimise existing systems, or use our expertise to design and implement a solution that will ensure our customers' assets are creating maximum returns.

### Electrical

SCL have a large team of experienced Electricians and Electrical Engineers, who are available to design, implement and maintain all electrical requirements for commercial and industrial applications.

Quality projects.  
Worldwide experience.

**SCL has successfully delivered hundreds of projects, worldwide.**

We have built an enviable reputation for being quality service providers and are chosen for our superior service capabilities and 'can do' attitude. Our extensive experience scopes across a broad and diverse range of industries and businesses.

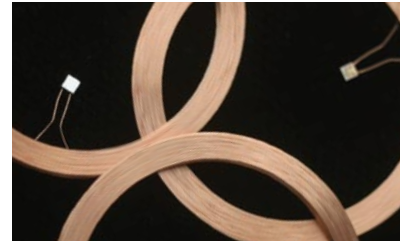

### Building Management Systems and Security

SCL offers scalable building management systems that improve the efficiency and security of businesses of all sizes. We offer a range of advanced security and monitoring systems that include CCTV and access control.

### Excalibur™ Range

The *Excalibur™* suite of products have resolved issues in the concrete industry making Plant Management and Batching not only simpler and more streamlined, but also more cost and time efficient.

### RFID systems

SCL is one of the world leaders in providing advanced RFID technology across many industries.

We aim to help our customers stand out from the rest and become leaders in their industry.

## Services

SCL offers a range of services to suit the specific requirements of our clients:

### Project Management

SCL have experienced project managers who can handle the complexity of putting together a complete technology solution...leaving you to focus on your core business.

### Consultancy

Our advisory service gives your project a solid grounding to start on. We bring more than a decade of experience to the table to plan and manage your project and identify potential problem areas. We can advise you on all aspects of design, products, and implementation to achieve the right solution for your business.

### Development and Design

We develop the options with our clients, which results in quality designs that meet project requirements and budget.

### Implementation and Commissioning

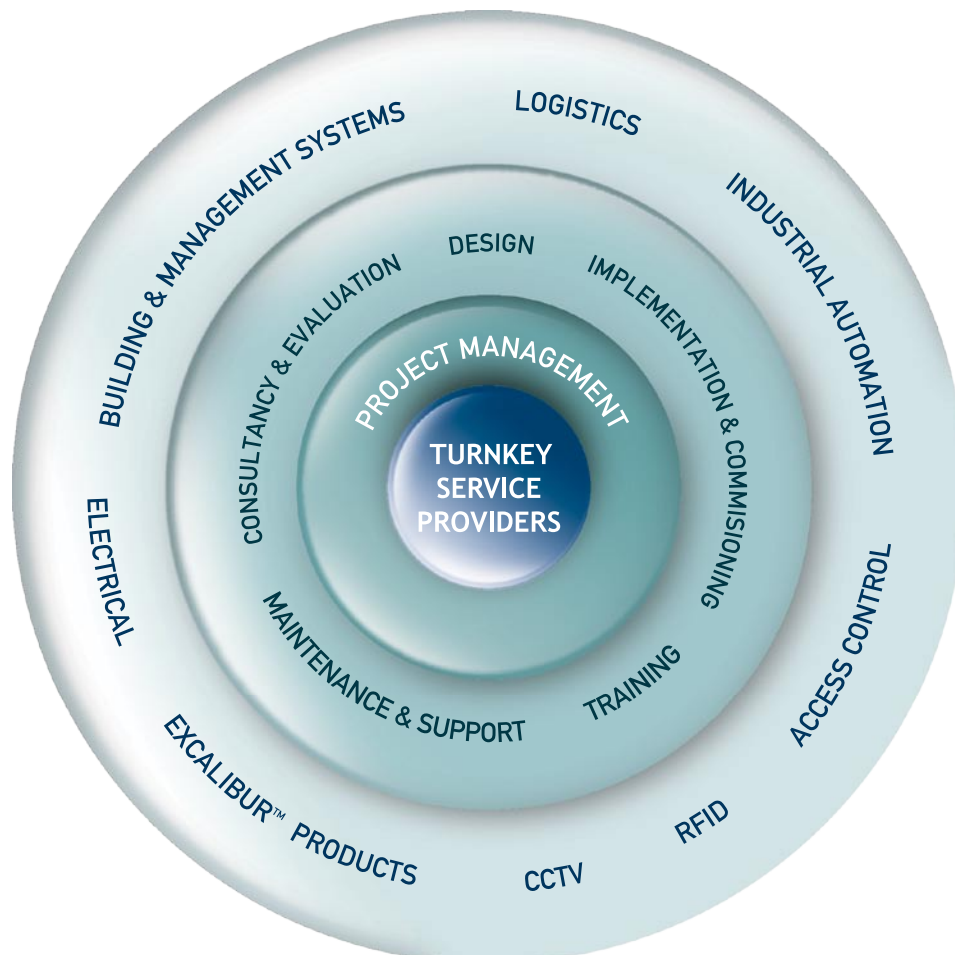

SCLs experienced team manage the implementation and commissioning of all systems ensuring the system meets all design requirements and timelines.

### Training

SCL provides comprehensive, on-site training for all completed applications as well as document familiarisation and operator manuals. We also offer specialised training on hardware.

### Maintenance and Support

We offer a range of maintenance and support options. Periodic maintenance through to full system support, SCL can act as an outsourced maintenance and support team.

The complete "turnkey" package;  
from evaluation, design and commissioning,  
to on-going support and maintenance.
